

Why is Attendance Important- even in Preschool and Kindergarten?

Studies show that regular attendance at school is important for young children. By attending school on time and regularly young students get comfortable with classroom routines, develop academic skills and most importantly Social Emotional Skills such as socializing with others and problem solving.

If you are having a difficult time getting your child to school or on time to school, please reach out to your child's teacher or case manager and our team will try and assist. We also have a School Social Worker, Deidre Krok who can share confidential referrals to outside agencies that work with you on housing, food access and family support services.

Creative Curriculum

Study: Building

What You Can Do at Home :

Study your house or apartment building with your child. What materials were used to build it? How many floors or stories does it have? How many rooms, windows, and doors does it have? Don't forget the basement if you have one! How old is your home? Who built it? What are its dimensions? Talk with your child about the buildings that you see together. Keep a list of the buildings that interest your child. Help your child investigate questions similar to the ones we mentioned above. Have fun exploring!
